3 YEAR OLD STAGS ON OFFER THIS YEAR

LOT 01

LOT 02

LOT 03

LOT 03

Dear Friends & Fellow Deer Farmers,

It gives us pleasure to present our 2018 sire sale catalogue.

It is fantastic to see the return of confidence and sustainable returns to our industry for both venison and velvet. This year we have on offer a selection of two and three year old velvet and trophy sires, as well as a quality line up of two year old high growth rate venison sires. The three year olds are currently residing at our Clinton farm and will be transported to Outram on sale day. We have a number of new stud sires represented in this year's line-up and you

will find information on those in the centre of the catalogue and on our website. Photographs of sale animals will also be available at blackforest.nz and on our Facebook page – facebook.com/blackforest.nz

Due to what has been a challenging season at Outram, selection of our two year old stags has been difficult and we do expect there will be some inclusions and exclusions come sale day, any such changes will also be updated online.

Our sale deer are produced from our fully recorded herd of 850 hinds. We carry all male progeny on the studs' home property at Outram until yearlings, and retain 250 rising two year old stags from which we make our selections for potential industry sires and replacements for our own commercial herd. Farmers can buy with the confidence in knowing these stags have been born and raised in a commercial environment and have been selected with intense selection pressure.

Our aim is to be breeding and offering stags with clean, heavy, correct, traditional velvet heads that go on to push out to be fantastic trophies. Most of the velvet and trophy bred stags catalogued would have cut well over 4kg of tidy velvet as two year olds. Those animals will certainly go on under good management to cut at maturity 8kg -9kg of velvet.

These stags will also produce outstanding long wide trophies at maturity too when grown out – our commercial herd continues to produce the industry's finest line of trophies every year.

All our two year old stags offered for Sale have been Tb and Johnes tested clear in mid-December 2017 in the pen. Most stags still had heads on, so is a good test for their temperament.

We are confident you will be successful in selecting fine young Sires to enhance the future direction and profitability of your herd and wish you luck with your purchases. We welcome any pre-sale enquires and will be happy to show you the line-up.

We are looking forward once again to catching up with friends, clients and new clients alike on Sale day and hope you will be able to take the time to relax and enjoy our hospitality and refreshments after the Sale.

Kind Regards
Richard and Sarah

Vendor Sale Conditions 2017

1. Black Forest Park retains a third party marketing condition on semen for the Lots offered in our 2018 Sire catalogue for a period of 4yrs transferable should the stag be sold within that period.
2. No animals, embryos or semen sold by Black Forest Park, or their germplasm, any subsequent progeny or germplasm, including the semen and germplasm of that progeny may be supplied to a third party without the written permission of the stud.
3. This condition does not affect normal commercial deer farming or stud farming or the normal sales of semen or embryos as it only applies to entities with the primary function of commercial semen/germplasm activities.
4. It is a condition of sale of any animals, embryos, germplasm or semen sold by Black Forest Park, that the purchaser agrees to include the following clause as a condition of any subsequent sale or gift of any animal, embryo, semen, germplasm or subsequent progeny or germplasm to a third party - "the purchaser acknowledges that it will not supply any animals, embryos, semen or germplasm to any commercial semen/germplasm marketing or sales entity, and will ensure that this clause is inserted as a condition of any sale or gift of any animals, embryos, semen or germplasm."
5. The sale will be conducted by PGG Wrightson with the conditions of sale as set down by the Stock & Station Agents Association, a copy of which is exhibited in the office on sale day.
6. The deer are the purchaser's property and risk at the fall of the hammer.
7. Warranties and Insurance are covered under separate headings.
8. Terms are strictly cash unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days of sale shall bear interest, at current rate per annum from the date of sale.
9. The sale is conducted exclusive of GST.
10. Overriding commission is payable to non-participating companies and recognised independent agents introducing and accompanying purchasers to the sale providing prior arrangements are made with PGG Wrightson.
11. Sale animals in velvet will have velvet removed after the sale, which will remain the property of the vendor.
12. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
13. Breed values represented on lots offered are current as at August 2016.

DISCLAIMER

All details and descriptions as to stock referred to in this catalogue have been supplied to PGG Wrightson by the vendor and have not been independently verified by PGG Wrightson. OTHER LATE ENTRIES

There may be changes to the line up of two year old stags on offer as they develop further. Details will be made available at **blackforest.nz**

We will also be offering lines of stud and elite commercial hinds. Details of these will be also be at blackforest.nz and made available on sale day.

NOTES

For new deer farmers or farmers purchasing a new sire for the first time, we offer the following suggestions for the care and management of new and existing Sire Stags.

Remember your Sire Stags are the future of your herd, they carry the genetics for the future quality and production of your herd. Good stags are worth looking after!

Arrival of new stags

As deer develop strong social structures in their groups there can be a degree of stress involved in taking young stags from their mobs and transporting them to a new property and herd.

However this can be minimised with a little understanding and common sense.

Stags should be selected early and shifted to your property before the end of January if at all possible, to allow time to settle and adjust prior to the rut. Ideally the stag should be introduced to a small group of say 15 stags of his own age as soon as he arrives - this should be done in the yards rather than let the new stag out by himself (new stags should never be left in the yards by themselves). Alternatively the stag could be put with hinds, but young stags should not be put in with older groups of Stags or Spikers. This method will minimise stress & assist the stag to settle quickly in his new environment.

Mating Stags

Out with hinds for single sire mating by 10th March or if using Eastern Stags by the 1st of March to take advantage of their potential early mating and calving characteristics.

2yr stags should easily mate 25-30 hinds, 3yr stags 40 hinds, older stags approx 50 hinds.

A stag can often mate more hinds than this, but this may increase calving spread and body weight loss with a marked loss of production performance from the stag.

Mating mobs should always have a paddock between and yearling hinds should always be mated separately.

If using backup sires these should go out after two cycles or 36 days and the original sires go to their own separate paddock.

Stags out

Approx 10th May take stags out from the hinds one at a time and put to their separate Sires' paddock with good saved grass. Start with the dominant Sire first and work down to the youngest. This procedure helps minimise fighting and bullying of the younger stags.

Maintenance

Sire stags should be regarded as at least six stock units and well supplemented with high energy feed over winter, especially in the south.

A good level of care will help ensure the owner is rewarded with fit, healthy stags that can perform to their potential.

Lynne Rhodes AI specialises in the artificial insemination of Red Deer and Elk throughout New Zealand, Australia and North America.
